M

EVERY TIME YOU CREATE A JEWEL you start from an inspiration, that little light, an idea that flashes in your mind and kicks off the creative process. The goal is to create a beautiful ornament, which enriches the appearance of the wearer and enhances its peculiarities. But it can't just be this.

IT IS ALWAYS SAID THAT ARTISTS ARE ENDOWED WITH A PARTICULAR SENSITIVITY and transfer it to their creations. The same happens to artists who deal with Contemporary Jewellery, like us.

AND THIS PAST YEAR HAS SHAKEN US TO THE CORE, to the point that we felt the need to tell, with our means and our language, the profound disturbances caused by wars (ever closer, ever more tolerated), by the overturning of roles (Who are the good

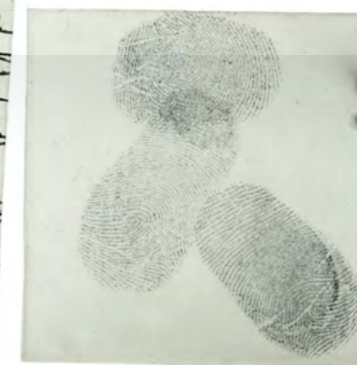

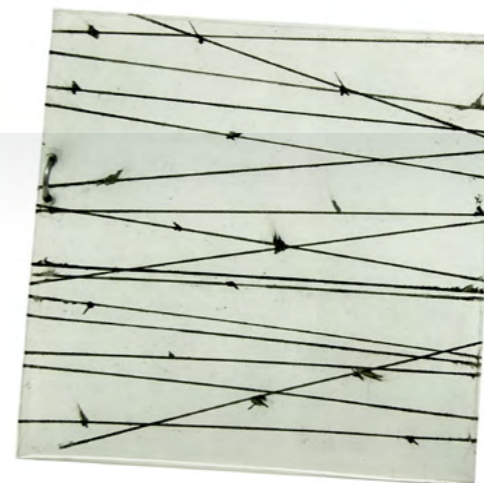

ones? Who are the bad ones?), by dictatorial laws, new walls, new barbed wire, new closed borders and CHAOS, disguised as ORDER.

WE HAD TO REPRESENT AND CRYSTALLIZE THIS DISTURBANCE because Contemporary Jewellery is not just "ornament" but can - indeed must - tell (even scream, if necessary) the contemporaneity that surrounds us. We are also convinced that those who choose to wear alternative jewelry have the desire and awareness to convey a message, not just beauty.

# 2024 CORTOCIRCUITI (2024 SHORT CIRCUITS)

SPECIAL CAPSULE

THIS IS HOW THE TWO LINES THAT WE PRESENT TO YOU IN THIS SPECIAL CAPSULE (**2024 CORTOCIRCUITI**) WERE BORN: The **MACERIE** and **(dis)ORDINE** necklaces. In their original artist version but, also, chromatically declined to meet other wearability needs.
